**V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement****1. Statement**

Novelty (N)	Claims	1	YES
	Claims		NO
Inventive step (IS)	Claims	1	YES
	Claims		NO
Industrial applicability (IA)	Claims	1	YES
	Claims		NO

**2. Citations and explanations (Rule 70.7)**

Reference is made to the following documents:

D1: US 4,017,925

D2: US 5,387,145

Claim 1 discloses a swim fin comprising a plastic fin panel having a length corresponding to about half of a shoe length, the fin panel comprising a hooked end portion bent downwardly by an angle of 45 degrees and blocked at both sides thereof, the hooked end portion having an air/water circulation slot formed at the respective blocked sides thereof.

D1 discloses a swim fin for maintaining a swimmer's foot in a predetermined angular relationship with respect to the swimmer's leg, particularly during a downward kick or leg extension mode.

D2 discloses a foot mounted fin for use by body surfers, divers, and swimmers. The strap of the swim fin fits around the ankle while the fin blade extends out beyond the foot. There is a scoop section designed to take in water at the top of the fin near the foot. The scoop section also channels the water to eyelet ports formed in the fin blade, enabling it to discharge water out.

Claim 1 meets the criteria set out in PCT Article 33(2)-(4), because D1 and D2 do not teach or fairly suggest a hooked end portion bent downwardly by an angle of 45 degrees and an air/water circulation slot at the respective blocked sides.
